

CERTIFICATE

This is to acknowledge that the device

Syskron ReadyKit

was undergoing a Security Assessment with a total effort of 12 person days from 10.10.2018 - 9.11.2018
in the laboratories of Limes Security in Vienna, Austria.

The following test cases were conducted:

- Integrity of data transmission
- Weaknesses in cryptographic mechanisms
- Physical security
- Software security and missing hardening practices
- Injection attacks
- Missing authentication
- Vulnerabilities in authentication and session handling
- Vulnerabilities in standard applications and software
- Weaknesses in network design
